Performance: Automatic Rotary Bottles and Jugs Filling and Capping Machine

Output: 30 - 60 units/min

Product: Liquid / Paste

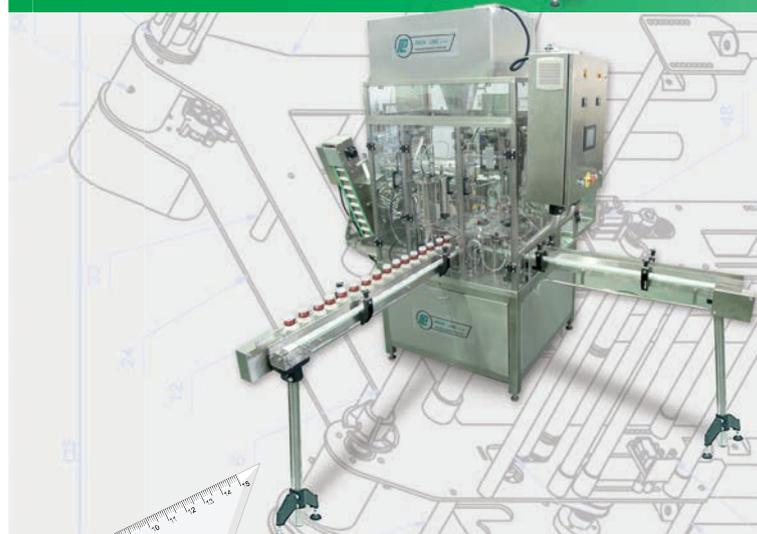

PFM is the rotary model of Pack Lines bottling machines line and it is designed based on mechanical rotary platform combined with pneumatic assemblies.

Our PMF is the best solution for bottling and capping mineral water, beverage, juice, salad dressings washing detergents and many other products.

The machine's main advantage is its extreme flexibility.

It can operate with up to 4 fillers for liquid and paste products.

The adjustment of the machine to different bottles and caps shape is fast and easy.

All product contact parts are stainless steel. The machine is manufactured using stainless steel, anodized aluminum and plastic, all of which conform to CE, FDA, 3A standards for food grade materials
